ABSTRACT

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of sections for reading, mathematics, and writing that must be passed as requirements for a high school diploma. Students who do not pass all three sections receive additional instruction and retake sections they have not passed. HSPT sections were administered to 6,973 Grade 12 students in 1994. Table 1 presents statewide results for these students, 5,854 of whom were retesting students, and 1,119 of whom were first-time test takers. Of the retesting students, 27.2% passed all the sections, while 54.8% of the first-time test takers passed all the sections. Of retesting students, 29.3% passed the reading test this time, 23.7% passed the mathematics test, and 41.9% passed the writing test. Table 1 presents statewide results for Grade 12 students, and tables 2 through 6 present results for each subject. The report also contains district-by-district and school-by-school results grouped by district factor group. District factor groups are groupings by socioeconomic status. (Contains 6 tables and a 43-page compilation of results.) (SLD)

Grade 11 High School Proficiency Test
October 1994

GRADE 12 RESULTS

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of three sections--Reading, Mathematics, and Writing--and must be passed as one of the requirements for a high school diploma. Students who do not pass all three sections will receive additional instruction and will be retested on the section or sections they did not pass. The Total HSPT11 Reading, Mathematics, and Writing scores are reported as scale scores with a range of 100 to 500. The passing score is 300.

One or more sections of the HSPT11 was administered between October 18 and 20, 1994 to 6,973 Grade 12 students. This figure excludes those students classified as special education or limited English proficient.

This report includes a series of tables summarizing test results for the State, Special Needs Districts, All Other (not special needs) Districts, and District Factor Groups (DFGs).

Table 1 presents statewide results for Grade 12 students who took the October 1994 test. Of the 6,973 Grade 12 students who took the October 1994 test, 5,854 were Grade 12 retesting students and 1,119 were Grade 12 first-time testing students. Of the 5,854 Grade 12 students who were retested with HSPT11, 27.2% of the retesting students passed all the sections attempted (whether one, two, or three). Of the 1,119 Grade 12 first-time testing students, 54.8% passed all the sections.

Results for each subject--Reading, Mathematics, and Writing--are included in Tables 2 through 6. Finally, the report contains district-by-district and school-by-school results grouped by DFG. An explanation of the District Factor Groups is included at the end of this report.

The HSPT11 scores in this report exclude special education students, limited English proficient students, and students whose answer folders were voided.

The data in this report are based on information collected from students' answer folders. Subsequent to the distribution of test results in January 1995, there was a procedure for amending student identification information to correct errors that were made when students' answer folders were completed. Corrections to student identification information that were received by the State Department of Education by February 3, 1995 have been included in these summaries.

Highlights from the October 1994 Grade 12 Tables

Special Needs

Of the 3,163 Grade 12 students in the Special Needs Districts who took the October 1994 test, 2,876 were Grade 12 retesting students and 287 were Grade 12 first-time testing students. 18.5% of the retesting students passed all the sections attempted (whether one, two, or three). 27.2% of the first-time students passed all three sections.

All Other

Of the 3,810 Grade 12 students in the All Other (not special needs) districts who took the October 1994 test, 2,978 were Grade 12 retesting students and 832 were Grade 12 first-time testing students. 35.6% of the retesting students passed all the sections attempted (whether one, two, or three). 64.3% of the first-time students passed all three sections.

District Factor

The percent of Grade 12 retesting students who passed all the sections attempted ranged from 17.7% of 2,742 students in DFG A to 44.0% of 193 students in DFG I. (Because ten or fewer students in DFG J retested in Grade 12 in October 1994, these numbers are not reported.) The percent of Grade 12 first-time testing students who passed all three sections ranged from 22.6% of 279 students in DFG A to 90.9% of 11 students in DFG J.

Reading

Of the 4,554 Grade 12 students who took the Reading section, 3,534 were retesting students and 1,020 were first-time testing students. Of the 3,534 retesting students, 1,035 students or 29.3% passed Reading. Of the 1,020 first-time testing students, 741 students or 72.6% passed Reading.

Mathematics

Of the 4,349 Grade 12 students who took the Mathematics section, 3,314 were retesting students and 1,035 were first-time testing students. Of the 3,314 retesting students, 787 students or 23.7% passed Mathematics. Of the 1,035 first-time testing students, 747 students or 72.2% passed Mathematics.

Writing

Of the 3,236 Grade 12 students who took the Writing section, 2,233 were retesting students and 1,003 were first-time testing students. Of the 2,233 retesting students, 935 students or 41.9% passed Writing. Of the 1,003 first-time testing students, 812 students or 81.0% passed Writing.

DISTRICT FACTOR GROUPS

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from New Jersey's statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. A revision was made in 1984 to take into account new data from the 1980 United States Census. The DFG designations were updated again in 1992 using the following demographic variables from the 1990 United States Census.

A. Percent of adult residents who failed to complete high school

B. Percent of adult residents who attended college

C. Occupational status of adult household members:

1 = laborers
2 = service workers (except private and protective)
3 = farm workers
4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foreman, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

D. Population Density:

persons per square mile

E. Income:

median family income

F. Unemployment:

percent of those in the work force who received some unemployment compensation

G. Poverty:

percent of residents below the poverty level

The variables described above were combined using a statistical technique called principal components analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their score on this measure and divided into eight groups based on the score interval in which their scores were located. Eight DFGs have been created based on the 1990 United States Census data. They range from A (lowest

socioeconomic districts) to J (highest socioeconomic districts) and are labeled as follows: A, B, CD, DE, FG, GH, I, J. Updating the DFGs has not changed any district's designation as Special Needs or not Special Needs.

Whereas the DFGs based on the 1980 United States Census resulted in 10 groups containing approximately equal numbers of districts, the DFGs based on the 1990 United States Census resulted in eight groups of different sizes depending on their score. The number of districts* in each DFG is now as follows:

DFG	Number of Districts
A	35
B	78
CD	75
DE	100
FG	87
GH	78
I	105
J	15

* Includes all New Jersey's public school districts (regardless of school configuration or grade levels served).
